## DETAILED ACTION

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 11-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP 08-030027 or JP 2002-072548 or JP 2002-236393.

The abstracts of the cited prior arts disclose toner compositions comprising polyester that may be obtained from components as claimed. It is the Examiner's position that the claims would at least have been obvious based on the limited disclosures of the abstracts of the cited prior arts

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 11-19 are rejected under 35 U.S.C. 102(a) as being anticipated by JP 2002-341595 and JP 2003-066653.

The abstracts of both of the cited prior arts disclose toner compositions comprising a polyester comprising aliphatic diols, and having characteristics as claimed.

5. Claims 11-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Ito et al 5,409,989 and Tajiri et al 5,153,301.

The abstracts of the cited prior arts disclose polyester resins for toner wherein the polyester comprises an aliphatic diol and has characteristics as claimed.

6. Claims 1-23 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 2002287427.

This prior art discloses polyester-resin based toner for electrography image development. The polyester composition is based on a blend of polyester having features and characteristics as claimed.

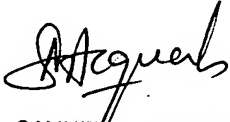

7. References listed on PTO-1449 have been made part of the record.
